## AMENDED

## APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of filing in State Engineer's Office	OCT 1 5 1991
Returned to applicant for correction	NOV 0 6 1991
Corrected application filed	NOV 27 1991
Map filed	NOV 27 1991 under 56831
The applicant Newmont Go	Id Company by its agent, Charles Zimmerman
P.O. Box 669	of Carlin
Nevada 89822 State and Zip Code No.	, hereby make. application for permission to appropriate the public
waters of the State of Nevada, as hereinaft	ter stated. (If applicant is a corporation, give date and place of incorporation; if a
copartnership or association, give names	of members.) Incorporated May, 1986.
Incorporated in Dela	ware, USA.
1. The source of the proposed appropri	nation is underground, within Gold Quarry pit dewatering under Name of stream, lake, spring, underground or other source
the proposed point of div	ersion (5.), from one or more production wells
2. The amount of water applied for is	40.00 (17953.20 gpm; 28978.6 Acre Ft/Yr; 9442.7 second-freet
(a) If stored in reservoir give numbe	r of acre-feet 6000 Acre Ft (1,955,100,000 gallons) milling, irrigation, infiltration, surface discharge,
	C. and/or dewatering   Irrigation, power, mining, manufacturing, domestic, or other use. Must limit to one use.
4. If use is for:	
(a) Irrigation, state number of acres	to be irrigated
(b) Stockwater, state number and kin	ids of animals to be watered
(c) Other use (describe fully under	'No. 12. Remarks'')See 3. above
(d) Power:	
, (1) Horsepower developed	
(2) Point of return of water to st	тсат
5. The water is to be diverted from its	source at the following point within the SW quarter of section  Describe as being within a 40-acre subdivision of public
	, at a point from which the NE corner of section 36, T34N, ner. If on unsurveyed land, it should be so stated.
R51E, M.D.B.&M., an extan	t brass cap, bears N66° 52'E, a distance of 10,008 feet.
6. Place of use <u>sections 21,22,</u>	23.24.25.26.27.28.33.34.35. and 36 of T34N. R51E. M.D.B. &M. Describe by legal subdivision. If on unsurveyed land, it should be so stated.
sections 19,20,28,29,30,3	1.32.33.and 34 of T34N. R52E. M.D.B.&M.: sections 1.2.3.4.
17,18,19,20,21,22,27,28,2 and 35 lying within the n of sections 33 and 34 lyi	of T33N. R5]E. M.D.B.&M.: sections 3.4.5.6.7.8.9.10.15.16 9,30,31,32, that portion of sections 2,11,14,23,26,34, atural drainage basin of Maggie Creek. and that portion ng within the natural drainage basin of Mary's Creek of
7. Use will begin about January	1 and end about December 31 of each year.
	nder the provisions of NRS 535.010 you may be required to submit plans and
	torage works.) Multiple dewatering wells equipped with pumps. State manner in which water is to be diverted, i.e. diversion structure, ditches and
motors, totalizing flowne dumes, drilled well with pump and motor, etc.	ters, and pipelines to the place of use.
9 Estimated cost of works thirty	-two million dollars (\$32,000,000,00)

10. Estimated time required to construct works. twelve years  If well completed, describe works.	
11. Estimated time required to complete the application of water to beneficial usc. twelve years	
<ol> <li>Remarks: For use other than irrigation or stock watering, state number and type of units to be served or as consumptive use.</li> </ol>	anual
This application is hereby submitted for a permit for water rights to dewater	<u>Newm</u> ont
Gold Company's Gold Quarry minesite. It is understood that approving an application of this kind may require an order from the State Engineer similar to Order 103 allows for the appropriation of water from unspecified, multiple points of diversity within a specified quarter section for mine dewatering purposes. The amount of applied for is derived from preliminary studies of future mine dewatering required.	8, whic <u>ersi</u> on f water

Pro. wdr. 12/7/93  APPROVAL OF STATE ENGINEER	
This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the follows:	owna
limitations and conditions:	Jwng
amount of water herein granted is only a temporary allowance for the life of t mining operation associated with applications subject hereof. A totalizing met must be installed and maintained in the discharge pipeline near the point diversion and accurate measurements must be kept of water placed to beneficial us. The totalizing meter must be installed before any use of water begins, or before the proof of Completion of Work is filed. This source is located within an antidesignated by the State Engineer, pursuant to NRS 534.030.  This permit does not extend the permittee the right of ingress and egress public, private or corporate lands.  The issuance of this permit does not waive the requirements that the permitolder obtain other permits from state, federal, and local agencies and specifically issued contingent upon approval by the Nevada Division of Environment Protection of the dewatering project.  (CONTINUED ON PAGE 3)  The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and maintained in the devaluation of the devaluation of the devaluation of the amount which can be applied to beneficial use, and maintained in the discharge project to the amount which can be applied to beneficial use, and maintained in the discharge project to the amount which can be applied to beneficial use, and maintained in the discharge project to the amount which can be applied to beneficial use, and maintained in the discharge project to the amount which can be applied to beneficial use, and maintained in the discharge project.	of se. che cea on nit is

## (PERMIT TERMS CONTINUED)

This permit is issued subject to the provisions of the State Engineer Order No. 1055 dated April 1, 1992, concerning rules for well spacing and modification of well drilling regulations in Maggie Creek Groundwater Basin.

Any water obtained under Permits 53384, 53385, 54339, 54340, 54341, 55616, 55617, 55618, 55619, and 56831 through 56839, inclusive, as a result of the dewatering program by the permittee shall be used first for the beneficial uses of mining, milling, heap leaching, drilling, construction, dust suppression and other related mining and milling uses within the place of use as described, hereinafter referred to as mining and milling purposes.

Water not used for the aforementioned purposes must be used for mitigating any impacts to existing groundwater or surface water right holders. Before any water can be utilized for mitigation purposes, the permittee must apply for and receive from the State Engineer any approval necessary.

The State Engineer may require injection of excess water, or substitution for other permitted groundwater uses as other possible mitigation measures.

Water may be placed in the Maggie Creek Reservoir (approved on July 21, 1992 under Dam Safety Permit J-387) and upon receipt of the necessary permits from the Nevada Division of Environmental Protection, may discharge water to various Humboldt River drainage systems. The use of this water shall be subject to the Humboldt River Decree.

Any approval granted by the State Engineer for irrigation purposes using water under these permits shall be within the irrigation season as specified in the Humboldt River Decree. Any water used on lands not previously under irrigation or having irrigation water rights must be substituted by foregoing irrigation on an equal number of acres and acre-feet under Proof No. 00171 of the Edwards' Decree of the Humboldt River Adjudication. The substitution shall be based on actual water used for the additional acreage and offset by actual allocations from the Humboldt River. Any schedule of irrigation shall be submitted to the Division of Water Resources' Supervising Water Commissioner prior to the actual irrigation of that land. The Supervising Water Commissioner will then set what lands and priorities will not be served under Claim No. 00171 of the Edwards' Decree.

Any other impacts caused on the Humboldt River system by this dewatering must be mitigated in a manner approved by the State Engineer.

A monthly report shall be submitted to the State Engineer within 10 days from the end of each month which shall include the amount of water pumped from each well; the amount used for mining and milling purposes; the amount diverted to the reservoir; the amount discharged to any surface drainage and which drainages; the amount injected back to the groundwater with the location of the well and the depth to where water is injected; and the amount of water used for any other purpose allowed under these permits. All groundwater and surface water monitoring data shall be submitted to the State Engineer on the same basis as specified in Appendix "A" - Mitigation Plan of the Final Environmental Impact Statement, Newmont Gold Company's South Operations Area Project (November 1993).

The total combined duty of water under Permits 40900, Certificate 13392, 47962, 48328, 48330, 48910, 48911, 48912, 49550, 49916, 49962, 51962, 52330, 52331, 52332, 52883, Certificate 13398, 52884, 53384, 53385, 54339, 54340, 54341, 54510, 55616, 55617, and 56831 through 56839, inclusive, shall not exceed 10,660.42 acre-feet annually for mining and milling purposes.

The total diversion rate allowed under all permits associated with the dewatering program and all related mining and milling purposes shall not exceed 110 cfs.

A year-end report shall be submitted to the State Engineer no later than 45 days after the end of the calendar year as to how many wells have been drilled under this permit as well as how many wells have been abandoned. The exact location of each well drilled or abandoned shall also be supplied in this report, and illustrated on a supporting map.

Upon permanent dessation of all mining and milling purposes, and dewatering, all water granted under these permits shall revert back to the source from which it was appropriated except for any water requirements needed for any mine closure plan and/or to mitigate any adverse effects caused by dewatering.

The State Engineer retains the right to require at anytime the permittee to cooperate in funding of additional monitoring and modeling by an independent third party.

The State Engineer retains the right to impose future conditions as necessary upon review and evaluation of all data submitted reporting on the dewatering program, water use and the monitoring plan.

The permittee, on a quarterly basis, shall prepare and present an update on the activities of the mine and dewatering projects, and the Maggie Creek Basin Monitoring Plan, submitted September 10, 1992.

To protect existing rights and public interest, the State Engineer retains the right to regulate any or all pumping under the dewatering project and/or any other groundwater withdrawals herein authorized.
